Introduction

With over 6 years of experience in product design, I've tackled a diverse range of challenges that have sharpened my skills. From optimizing the user flow for purchasing airplane tickets to developing a talent acquisition SaaS from the ground up, I have consistently focused on removing barriers that hinder user engagement. I've also had successful collaborations with various businesses to turn their ideas into reality. Product design is also a way to align my passion for problem-solving with my desire to enhancing the lives of others.

Work experience

Cube10.io

Design & development agency

Outstanding skills

Versatility

Enables me to adapt to diverse design challenges and collaborate effectively across teams.

Visual thinking

Allows me to illustrate concepts in my mind, helping me understand relationships between elements.

Empathy

Ensures better understanding of human needs and emotions, leading to find true painpoints.

Communication

Allows me to articulate my thoughts clearly, fostering collaboration and alignment.

Critical thinking

Enables thorough problem analysis and informed design decisions.

Attention to detail

Ensures that every aspect of the design is meticulously crafted, resulting in polished products.

System thinking

Provides a holistic view of how product components interact, enhancing overall design.

Negotiation

It helps me achieve mutually beneficial outcomes while fostering positive relationships.

Education

(BSc) Chemical Engineering

Sahand University of Technology
2007-2011
